Palakkad, Kerala, India

PROFESSIONAL SUMMARY

AI Engineer building production GenAI backends in Python, FastAPI, and AWS. Hands-on with LLM integration, RAG pipelines, agentic workflows, voice biometrics, and computer vision. Shipped secure, role-controlled AI services for healthcare and fintech use cases, ready to deliver client-facing AI solutions.

TECHNICAL SKILLS

Languages: Python, SQL

GenAI & Agents: RAG, LLM Integration, Agentic Workflows, LangChain, LangGraph, MCP, Prompt Engineering, Gemini API, LLaMA 3.1, HuggingFace

ML & Vision/Audio: TensorFlow, PyTorch, Scikit-learn, OpenCV, MediaPipe, SpeechBrain

Backend & Cloud: FastAPI, REST APIs, JWT/OAuth2, RBAC, AWS (EC2, RDS, S3, IAM, Amplify), Docker, Git

Data & Databases: PostgreSQL, MySQL, ChromaDB, Pandas, NumPy

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern | IntelliDent AI, Dubai, UAE (Hybrid)

Mar 2025 – Feb 2026

- Cut dental diagnostic report generation from 1+ minute to 20 seconds by architecting a multi-stage LLM pipeline in Python/FastAPI that chains an in-house teeth classification model with the Gemini API to produce structured reports.
- Secured patient imaging data by deploying a HIPAA-compliant backend on AWS (EC2, RDS, S3) with RBAC and JWT/Google OAuth2 authentication.
- Built a biomedical research crawler for PubMed and ClinicalTrials.gov, adding automated clinical literature ingestion to the platform's data-governance layer.

Backend Software Engineer / Cloud Architect (Freelance) | GoBright, Remote

Jun 2025 – Mar 2026

- Delivered backend services and REST APIs in Python for a multi-platform smart laundry ecosystem serving Admin, Vendor, and Client layers.
- Stood up production AWS infrastructure (EC2, RDS PostgreSQL, IAM, Amplify) and enforced least-privilege, role-based access through IAM policies.

PROJECTS

WebRAG – Web Grounded RAG Assistant | LangChain, LLaMA 3.1, ChromaDB

- Reduced hallucinated answers by grounding LLaMA 3.1 in live web content through a RAG pipeline: WebBaseLoader extraction, 1500-character overlapping chunks (RecursiveCharacterTextSplitter), and 768-dimensional gte-base-en-v1.5 embeddings stored in ChromaDB.

VoiceAuth Pay – Voice Biometric Banking System | FastAPI, SpeechBrain, AWS, Flutter

- Replaced OTPs with voice-biometric 2FA at sub-500ms response times, using SpeechBrain ECAPA-TDNN 192-dimensional embeddings verified by cosine similarity behind an async FastAPI service on AWS.
- Added Logistic Regression fraud detection and encrypted biometric storage, with a Flutter mobile client.

SIGNSENSE – AI Sign Language Translator | CNN, OpenCV

- Reached 93% gesture recognition accuracy in a real-time Indian Sign Language to text (and reverse) translator across regional languages, built with a CNN and OpenCV.

EDUCATION

B.Tech in Computer Science and Engineering | APJ Abdul Kalam Technological University

Nov 2020 – Jul 2024

CERTIFICATIONS & AWARDS

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional

Jul 2024

- Microsoft Certified: Azure Fundamentals (AZ-900)

Jan 2024

- 2nd Place, Google AI Campus Fest – Real-time facial expression recognition (TensorFlow, OpenCV, MediaPipe)

Sep 2023
